PROFESSIONAL SUMMARY

Senior UX Designer with 4+ years of experience and a Computer Science Engineering background, specialising in B2B SaaS and operational dashboards for manufacturing companies. Expert at designing KPI-driven interfaces that surface critical data clearly — enabling operations teams to make faster, more confident decisions. Experienced in collaborating closely with data scientists, data engineers, and software engineers to translate complex data models into intuitive, user-centred experiences. Track record of measurable impact: 50% faster processing, 60% quicker quote turnaround, and 30% fewer manufacturing errors.

CORE COMPETENCIES

UX & Design: User Research · Usability & A/B Testing · Wireframing & Prototyping · Design Systems · Information Architecture · Visual Design · Accessibility

Tools: Figma · Figma Make · FigJam · Adobe XD · Miro · Framer · Lovable · Claude AI

WORK EXPERIENCE

UX Designer L2

Nov 2025 – Present

Strides Pharma Science, Bengaluru · Lighthouse for Quality Programme

- Designed an Equipment Reliability dashboard for the engineering team, integrating IoT sensor data across manufacturing equipment to track health, functional status, and key metrics including MTTR and MTBF breakdowns.
- Delivered two QC Lab dashboards — (1) a Lab Error tracker enabling analysts to monitor instruments, review test results on manufactured products, and surface OOS/OOT deviations for faster corrective action; (2) a Review by Exception view visualising end-to-end process workflows with exception-based filtering to streamline oversight and reduce review time.
- Created an R&D; Lab Scale-Up dashboard to track assay and dissolution data, monitor product development steps, and surface nearest-neighbour comparisons using preset analytical models to support data-driven formulation decisions.
- Led UX for a Gen AI-powered SOP & STP document management dashboard, enabling teams to track document errors, manage edits, and leverage AI-assisted content validation to ensure audit readiness for regulatory bodies including the FDA.

UX & UI Designer

Apr 2022 – Sep 2025

Brigosha Technologies, Bengaluru

- Collaborated with R&D;, hardware, and cross-functional teams on a locomotive simulation project for Indian Railways and an internal onboarding module — reducing fresher onboarding time by 50% and improving process comprehension by 80%.
- Crafted a document analyser and conversational AI web app that reduced information processing time by 50% and increased user satisfaction by 35%, streamlining workflows for a global technology services leader.
- Designed a Smart Pricing web app for a global pulley lagging specialist, reducing manufacturing errors by 30% and increasing production throughput by 25% through automated configuration flows.
- Spearheaded a real-time vehicle monitoring application for a leading tyre manufacturer, cutting vehicle downtime by 15% and boosting overall operational efficiency by 20%.
- Revamped the B2B product website and designed a membership platform for Assam Society of Bangalore — driving 30% higher engagement, 20% more conversions, and 25% growth in online registrations.

EDUCATION

B.Tech — Computer Science Engineering

Graduated 2021

Angadi Institute of Technology and Management, Belgaum
